

Contents

	<i>Units</i>
Introduction	
1 Numerical Methods	
1.3 Parabolic Partial Differential Equations	7
1.8 Hyperbolic Partial Differential Equations	8
2 Waves	
2.7 Soliton Solutions of the KdV Equation	7
2.10 Phase and Group Velocity	8
3 Fluid and Solid Mechanics	
3.1 Boundary-Layer Flow	6
3.8 Wind-forced Ocean Currents	10
4 Dynamics	
4.3 The Rotating Top	6
5 Quantum Mechanics	
5.1 Band Structure	8
6 Electromagnetism	
6.1 Diffraction Pattern due to a Current Strip	7
7 Mathematical Methods	
7.5 Padé Approximants	8
7.6 Insulation	10
9 Operational Research	
9.3 Protein Comparison in Bioinformatics	8
9.5 The Google PageRank Algorithm	5
10 Statistics	
10.3 Bootstrap Estimation of Standard Error	5
10.15 Variable Selection and the Bias-Variance Tradeoff	8
11 Statistical Physics	
11.2 The Ising Model in One Dimension	10

12	Nonlinear Dynamics & Dynamical Systems	
12.8	A Nonlinear Map and the Dynamics of Hydrogen Atoms in Electric Fields	7
12.9	Differential Equations for Nonlinear Oscillators	10
14	General Relativity	
14.1	Particle or Photon Orbits near a Black Hole	8
14.7	Gravitational Radiation from Point Masses in a Keplerian Orbit	8
15	Number Theory	
15.3	Positive Definite Binary Quadratic Forms	9
15.6	Computing Roots Modulo p	7
16	Algebra	
16.8	The Character Table of a Finite Group	9
16.9	Resultants and Resultants	8
17	Combinatorics	
17.5	Matchings	6
17.7	Graph Planarity	10
19	Communication Theory	
19.2	Information Content of Natural Language	4
20	Probability	
20.1	The Percolation Model	7
20.2	Importance Sampling and Fast Simulation	5
23	Astrophysics	
23.1	Generating a Consistent Self-Gravitating System	8
23.4	Stellar Structure	8

You may choose freely from the projects above, independently of whether you are studying the examinable courses with which your chosen projects are connected. For up-to-date information on the maximum credit for the Computational Projects in Part II of the Mathematical Tripos, and the total number of units required to achieve that maximum, please consult both the [Undergraduate Schedules](#) of the Mathematical Tripos and § 2.1 of the Introduction. Please also see § 2.1 of the Introduction for more information on how credit is awarded.
