Installation of Matlab R2011a for Windows – Step by step guide
(Screenshots based on 2009a install)

Requirements.
- An internet connection
- A DVD reader
- Matlab media – DVD
- Matlab serial number

1. Load the DVD into the PC you want to install Matlab onto. The DVD should automatically start the installation program whereby you will see the first splash screen.

2. You need to agree to the Mathworks license.

Press Next…

![Typical installation dialog box]

Press Next…

4. Choose the location of the installation.

![Location selection dialog box]

Press Next…
5. If the location doesn’t exist, you will be prompted to create it.

Press Yes…

6. Confirm the installation settings by pressing Install

7. Matlab will now install, this may take several minutes
8. After the installation has completed, you then need to license your install.

You need to have the serial number ready. This number can be located on the DVD case.

Press Next…

9. Matlab will initially make an internet connection the Mathworks prior to you entering the serial number.

10. Answer Yes when asked if you are a student.
12. Enter the serial number and your @cam email address e.g. ab123@cam.ac.uk

Press Next...

Continue with the rest of the registration process until the installation is complete.
